Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,623,485. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter claimed in the application was fully disclosed in the patent application. Therefore, the patent protection already granted in the patent would be extended by the allowance of the claims in the application; and there is no apparent reason why applicant was prevented from fully prosecuting the broad claims in the patent application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mullane (6,050,997) in view of Ganem (6,022,350).

With respect to claims 1,2 5-7, Mullane discloses an anchoring assembly comprising a bone engaging member (12,20) with a retention cavity (34); arranged to engage a linking member (22); a spherical exterior (32) a circular open mouth (36) and a retention member (24) for maintaining linking member and a support collar (18).

It is noted that Mullane did not teach of a split ring, as claimed by applicant. However, in a similar art, Ganem evidences the use of a split ring for ease of installation.

Therefore, given the teaching of Ganem, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide mullane with the split ring as taught by Ganem for ease of installing.

Allowable Subject Matter

Claims 3 and 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
